

# HYPERTENSION MONITORING PROGRAM

## Program Highlights:

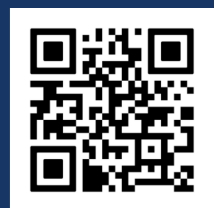

- **Comprehensive Patient Toolkit:** Blood pressure monitor, weight scale, educational resources, and personalized hypertension management guidance from specialized OB RNs.
- **Ongoing Monitoring:** Tracks progress, ensures compliance, and eliminates paper logs.
- **Provider Updates:** Customizable clinical reports with accurate and actionable patient data.
- **24/7 Expert Support:** Patient access to our dedicated Trinity OB Patient hotline and a mobile app for self-tracking and direct chat.

## Benefits:

- **Reduced Complications:** Helps minimize risks of preeclampsia and other hypertension-related conditions for mothers and babies.
- **Proactive Management:** Early identification of blood pressure changes allows timely interventions or medication adjustments.
- **Accurate Reporting:** Reliable data keeps providers informed for better decision-making.
- **Enhanced Compliance:** Reinforces education to empower patients to manage their hypertension effectively.
- **Digital Tracking:** Eliminates manual logs with real-time blood pressure monitoring.
- **No Cost Program:** Free for providers and patients, with no copays or deductibles charged.
- **Fewer Inquiries:** Decreases office calls and after-hours contacts to providers.

## Clinical Referral Criteria:

Patients eligible for enrollment include those with chronic or gestational hypertension, preeclampsia risk, uncontrolled blood pressure, or postpartum hypertension requiring close monitoring and timely intervention.

**Direct Referrals, Instant Care. Scan Here to Get Started.**
