

TRUSTED EXPERTS IN HIGH-RISK OB HOMECARE

HYPEREMESIS MANAGEMENT PROGRAM

Our Hyperemesis Management Program offers personalized, timely, and comprehensive care for pregnant patients experiencing severe nausea and vomiting (hyperemesis gravidarum).

Key Features:

- **Immediate Patient Care:** We aim to start care within 2 hours of receiving a referral, ensuring prompt symptom management and patient support.
- **Comprehensive Treatment Plans:** Expert care includes continuous medication infusion management, nutritional guidance, hydration therapy (if needed), and ongoing monitoring.
- **24/7 Patient Support:** Patients have access to a dedicated hotline and text messaging system for round-the-clock guidance and reassurance.
- **Collaborative Approach:** Real-time updates keep providers informed, while seamless integration into care workflows reduces the workload on medical staff.
- **Cost-Free Services:** No cost to the provider or the patient, ensuring accessibility and ease of implementation.

Program Benefits:

- **Enhanced Patient Outcomes:** Prevents complications through consistent monitoring and early intervention.
- **Reduced Burden on Providers:** Our team manages patient education, compliance, and symptom tracking, allowing providers to focus on critical clinical tasks.
- **Seamless Process:** We handle the transition of care for referred patients, making the process simple and efficient for your practice.

Clinical Referral Criteria:

Refer patients with Hyperemesis Gravidarum (HG) for severe, unresponsive nausea and vomiting, significant weight loss, dehydration, or recurrent hospital visits to ensure timely care and prevent complications.

Direct Referrals, Instant Care. Scan Here to Get Started.
